

Transcat PLM in brief

Transcat PLM, a fully-owned subsidiary of Dassault Systèmes founded in 1987, is a specialist and a supplier of Product Lifecycle Management (PLM) solutions. Our portfolio includes complementary software and infrastructure solutions based on Dassault Systèmes' core Products – CATIA, ENOVIA, DELMIA, SIMULIA and 3DVIA. Customized server, storage and system management concepts as well as a comprehensive package of services and industry solutions complete the portfolio. With its Product Data Quality (PDQ) broad expertise, Transcat PLM also provides solutions for process compliance used by more than 1,500 customers Worldwide.

Transcat PLM's offering for development, design and manufacturing and its server and support concepts help customers to optimize their processes and safeguard data quality in the product development stage. Customers include many leading names from the automotive, aerospace and consumer goods industries as well as mechanical and plant engineering.

Our extensive portfolio of products and services, developed in many years of experience and structured for tailored service and consultancy support, makes us your partner of choice with competence and reliability. Your solution will always be grounded in our customized Full Service Concept, as individual as your situation demands. Our all-inclusive PLM package addresses the three essentials your business needs to succeed: processes, technologies and people.

- Analysis of PLM process
- Definition design concept
- Project realization
- PDQ – Consulting

- SW – product consulting
- IT-HW strategy
- Best practices
- PLM / PDM / IT - benchmarks

- Training / support
- Business process outsourcing
- Helpdesk
- Knowledge management

Your local Transcat PLM

Transcat PLM has offices in Germany, Switzerland and Slovakia. More than 200 employees are ready to provide best advice and support available in your area. Transcat PLM supplies its international customers through a global network of PLM partners or directly via Dassault Systèmes. Wherever located, Transcat PLM delivers high performance systems at high quality for all its customers.

Expertise

Benefit from our know-how. Transcat PLM offers you more than twenty years of experience, development and innovation. Supported by our program of future-oriented training and staff development, we can keep our finger on the pulse for you. The best examples from our high performance, comprehensive and enduring range are our Transcat PLM in-house developed software products, such as Q-Checker, CAVA, XFileV5 and myV5. Partly the result of close collaboration with our customers, some of these have since found successful application around the world.

PLM Solutions

You'll find the perfect solution for every requirement in our portfolio of Dassault Systèmes-developed PLM software solutions: CATIA, ENOVIA, DELMIA, SIMULIA and 3DVIA, as well as complete systems support. Special add-ons developed in-house complete the range which we distribute and support worldwide. With our all-in-one concept, we can respond to any requirement profile with individual, multi-disciplinary technology combinations.

Service

Our product portfolio enables us to provide support covering your industrial needs. You'll receive the hardware required and all the essential services such as consultancy, project design, implementation and methodology, training and user support. Our particular strength lies in our process models which are customized for your systems, and our staff's extensive experience in project management ensures that systems are implemented and introduced with short lead-times and high user acceptance.

Partnership

The advantage for you with Transcat PLM is that you can source all your requirements from a single supplier. As a subsidiary of the software editor, Dassault Systèmes, we use absolute leading-edge technology so that you can rely on us to be fully up-to-date with state-of-the-art developments and options. Additional strategic partnerships complete the full picture of our range of products and services.
